REPORT

ON THE

RIVER-BORNE TRAFFIC OF THE LOWER PROVINCES OF BENGAL

AND ON THE INLAND TRADE OF CALCUTTA

AND ON THE TRADE OF CHITTAGONG PORT,

FOR THE YEAR 1897-98.

CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS report, the twenty-second of its kind published by the Government of Bengal, deals (1) with the trade registered on the rivers and canals of the Lower Provinces of Bengal, (2) with the inland trade of Calcutta, and (3) with the trade, inland and sea-borne, of the Chittagong Port during the official year 1897-98. It is based on the returns and reports noted on the margin. The system of registering the traffic was the same as in the previous year. Statistics relative to the rail-borne traffic of these Provinces have, since 1884-85, been reviewed in a separate report.

1. Fortnightly returns of traffic carried by country boats along the Bhagirathi, the Jalangi, and the Mathabhanga, commonly called the Nadia rivers.
2. Fortnightly returns of traffic carried by country boats on the Midnapore, Hijili, and Orissa Canals, and the Orissa Coast Canal.
3. Fortnightly returns of traffic carried to and from Calcutta by country boats and carts registered at a cordon of 26 stations around Calcutta and Howrah.
4. Monthly statements of traffic carried along the Brahmaputra and Meghna rivers by the steamers of the India General Steam Navigation Company and the Rivers Steam Navigation Company.
5. Monthly statements of traffic carried along the Ganges, the Bhagirathi, the Jalangi, and the Hooghly rivers to and from Calcutta by the steamers of the India General Steam Navigation Company, the Calcutta Steam Navigation Company, and the Rivers Steam Navigation Company.
6. Quarterly statements of traffic carried by country boats between Bengal and Assam registered at Bhairab Bazar on the Meghna river and at Dhubri on the Brahmaputra.
7. Monthly and quarterly returns of traffic carried to and from Calcutta by the East Indian Railway, the Eastern Bengal State Railway, and connected lines.
8. Annual statements of the sea-borne trade of Calcutta.
9. Annual statements of the inland and sea-borne trade of Chittagong.
10. Quarterly statements showing the wholesale prices per maund of all articles of trade received from four selected marts, and also from the Collector of Customs, Calcutta, the Board of Revenue, Lower Provinces, and from the principal Indigo and Tea Brokers in Calcutta.
11. Annual report by the Board of Revenue, Lower Provinces, on the administration of the Salt Department.
12. Special report submitted to Government by the local officers on the condition of the trade on the Nadia rivers, the Calcutta, Midnapore, Hijili, and Orissa Canals, and the Orissa Coast Canal.

Trade along the chief routes.

2. The statistics furnished in Chapters II to VII of this report include—

The boat traffic registered on the Nadia rivers.
The steamer traffic on the Ganges, Bhagirathi, Jalangi, and Hooghly rivers, as well as along the Midnapore Canal and the Orissa Coast Canal.
The boat traffic registered on the Midnapore and Hijili Canals.
The boat traffic registered on the Orissa Canals and Orissa Coast Canal.
The boat traffic registered on the Calcutta Canals.
The boat and steamer traffic on the Brahmaputra and Meghna rivers, internal and external (with Assam).

3. The boat traffic between Bengal and Assam on the Brahmaputra and Meghna rivers is registered at Bhairab Bazar and Dhubri under arrangements made by the Assam Administration. The steamer traffic along those rivers between Bengal and Assam is in the hands of the India General and Rivers Steam Navigation Companies. The steamers of these Companies also ply on the Hooghly and the Ganges between Calcutta and the marts in the districts named in the margin, and the Calcutta Steam Navigation Company runs steamers between Calcutta and marts in the Burdwan, Midnapore, Hooghly, Nadia, Murshidabad, and Balasore districts. The steamer service of the India General Steam Navigation Company between Calcutta and the North-Western Provinces, which was discontinued at the close of 1888-89, was re-opened in July 1896, and the statistics of the traffic carried between Calcutta and Ghazipur have been compiled and included in the trade returns of Bengal. All the above Companies have furnished Government with statistics of the traffic carried by them; and for this courtesy the acknowledgments of the Lieutenant-Governor are again due to the Agents of the Companies.

4. The inland trade of Calcutta and the inland and sea-borne trade of the Port of Chittagong are described separately in Chapters VIII and IX. The boat and road traffic of Calcutta is registered at 25 stations, placed on the Hooghly and on the canals and roads leading into Calcutta and its Suburbs and into Howrah, so as to form a cordon round the capital. For Chittagong the returns exhibit the sea-borne trade, foreign and coasting, including that carried by country boats.

2. The foregoing figures show a great diminution in the boat traffic carried on these rivers, specially in the case of the down traffic, which fell off from 37 lakhs of maunds in 1895-96 to only 25 lakhs of maunds in 1897-98, owing chiefly to decline in food-grains, the aggregate quantity carried during the past year being 6,47,210 maunds as against 12,99,912 maunds in 1896-97 and 16,62,942 maunds in 1895-96. The reports received from the toll-collectors show that the navigation along these rivers is gradually becoming more and more unsatisfactory, and the routes are not open all the year. On the other hand, the railway and inland steamers have to a very great extent diverted this trade to their respective lines, as the following extracts from the reports of the toll-collectors will show.

The Collector of Tolls, Bhagirathi river, states :—

"The traffic has been steadily decreasing, as will be seen from the statement of receipts during the last four years, owing generally to the unfavourable state of spring crops and the deteriorated state of the river, and to the Railway Company reducing their rates of freight during the rainy season to draw the river traffic to the railway."

The Collector of Tolls, Jalangi river, writes :—

"The prospects of any great improvement in the traffic on these rivers are not very encouraging, unless the river Ganges changes its course and pours in a strong flow of water at

the entrances of these rivers, and thus renders it possible for boats of ordinary dimensions from up country and from the northern and eastern districts of Bengal to pass up and down these rivers with ease in the dry season. Of course, both these rivers are navigable during the rains, but then the increased facilities offered by the railways attract a considerable portion of the river-borne traffic."

The Collector of Tolls, Mathabhanga river, offers the following remarks :—

"The entrance once again showed signs of improving during the rains, but owing to the existence of an obstruction in the shape of a bar across the channel a little distance below it, the improvement was temporary, and until this is removed we cannot hope to see the trade on the Mathabhanga resume its former proportions.

"The exports of coal and salt show a decline, attributable to the preference given to the inland steamer services, which now carry a large share of the goods that a few years back were consigned by boat to Northern Bengal and Assam."

3. The chief articles of merchandise which were carried by country boats along the Nadia rivers during the past three years are given below :—

4. The past year's traffic showed a further decline of 13·87 per cent. as compared with 1896-97, and 32·36 per cent. as compared with 1895-96. The fluctuations in the principal articles carried down stream during the past two years are shown below:—

5. *Jute, raw.*—The bulk of this traffic comes from Northern Bengal. Comparing last year's figures with those of 1896-97, the largest increases occurred in the consignments from Rajshahi (41,901 maunds), Purnea (25,526 maunds), and Dinajpur (33,150 maunds). The Eastern Bengal block also showed an advance of 1,04,800 maunds during the year under review, but the district of Murshidabad showed a decrease of 33,165 maunds.

6. *Food grains.*—There was a heavy decline in the food-grain traffic carried downwards along the Nadia rivers, amounting to 6,52,702 maunds, or 50·21 per cent., in comparison with the previous year, and 10,15,732 maunds, or 61·08 per cent., when compared with 1895-96. In the case of wheat, the largest decrease is shown against Murshidabad, which supplied 13,347 maunds, as against 62,213 maunds in the previous year. Among other supplying districts, Nadia showed a falling off of 44,505 maunds, Bhagalpur of 18,436 maunds, and Malda of 8,533 maunds. As regards gram and pulses, the figures showed a decrease of 5,17,719 maunds and 3,68,392 maunds in comparison with those of 1896-97 and 1895-96, respectively. The largest decline occurred in the consignments from Nadia, which supplied 1,96,368 maunds, as against 5,16,654 maunds in the previous year. Compared with 1896-97, the exports from Murshidabad fell off by 1,07,853 maunds, and those from Burdwan by 23,180 maunds. The contraction in the trade in rice is mainly due to shorter despatches from Dinajpur (93,27 maunds), Rajshahi (7,200 maunds), Bogra (2,300 maunds), and Malda (4,975 maunds). Under Miscellaneous, spring and rain crops, the figures showed an advance of 99,217 maunds on the returns of 1896-97 and of 44,984 maunds when compared with 1895-96. There was an improvement in the supplies drawn from Nadia, which showed an increase of 65,369 maunds as compared with 1896-97; the increase under Murshidabad was 31,301 maunds, and under Burdwan 9,746 maunds.

The different trade blocks from which the food-grain supply during the past two years was received are shown in the subjoined table:—

7. *Oilseeds.*—The trade in oilseeds, as compared with that 1896-97, showed an advance of 1,04,959 maunds, but the figures were still 1,75,955 maunds below those of 1895-96. As regards *Linseed*, the supply carried downwards during the year under review showed an increase of 15,050 maunds as compared with 1896-97, but a decrease of 2,82,935 maunds when compared with 1895-96. The improvement was chiefly due to larger consignments from Nadia (46,185 maunds), Malda (5,376 maunds), and Murshidabad (5,289 maunds). Under *Mustard seed* there was some recovery, the past year's trade being 74,229 maunds, and 1,17,481 maunds in excess of the figures for 1896-97 and 1895-96, respectively. Almost every supplying district contributed to the increase except Patna, Champaran, and Monghyr, which showed a falling off of 5,339 maunds, 4,555 maunds, and 3,338 maunds, respectively.

The following statements compare the total quantities of *Linseed* and *Mustard seed* carried down stream during the past two years, and show the different blocks from which the supplies were received :—

3. The report from the Toll-collector of the Mathabhanga river for 1897-98 shows that the steamer service now carries a large share of the goods that a few years back were conveyed by boat to Northern Bengal and Assam. The largest fluctuation has occurred in the export trade, which has nearly doubled in comparison with 1895-96. This was mainly due to a considerable supply of

steel rails and railway materials being carried during the year to Kolaghat station in the Midnapore district, for the Bengal-Nagpur Railway. The following statement shows the principal articles of commerce consigned to and from Calcutta during the past three years:—

4. The import traffic of Calcutta during the past year showed an increase of 23·05 per cent., when compared with 1896-97, but the figures are 12·14 per cent. below those for 1895-96. The increase occurred chiefly in the quantities exported from the Bihar and Eastern Bengal blocks. 2. The Midnapore Canal was twice closed during the year for repairs from Mohanpur to Lutchunapur (or practically to Ballichuk) from 1st to 16th April 1897, and from Mohanpur to Panskura from 20th to 31st March 1898. The Hijili Tidal Canal was open to traffic throughout the year, excepting the Ballighai branch drain, which was closed for silt-clearing for nearly three months, from 1st April to 24th June 1897. These temporary closings of the route do not, however, appear to have had a prejudicial effect on trade, judging from previous years, when no such stoppages happened.

There was a decrease in navigation receipts from Rs. 1,54,215 of the previous year to Rs. 1,32,235, owing (*a*) to a decrease in the grain trade, the previous scarcity having ceased, and the rice crop in the Midnapore district not having been very good, and (*b*) to the East Coast Railway taking their supply of coals along their own line, instead of sending them by the canals.

3. The different districts which contributed to the trade during the past three years are shown in the following statement :—

	Imports.			Exports.

4. The total weight of traffic carried downwards was 6,25,681 maunds or 15·35 per cent. below that of 1896-97, but 3,29,169 maunds or 10·55 per cent. in excess of the figures for 1895-96. The following statement shows the principal articles registered on these canals during the past year, with their fluctuations, as compared with 1896-97:—

5. Rice and paddy form the main articles of trade along these canals. The chief feature in the past year's traffic was a decrease in the exports from the Midnapore district as compared with 1896-97, as will be seen from the statement below:—

On this subject, the Executive Enginineer, Cossye Division, makes the following remarks:—

"There has been a falling off in revenue all the year through except in the months of May, July and February. The large exports of rice and paddy which began in 1895-96 and continued through the greater portion of the next year slackened in 1897-98, as the harvest gathered in December 1896 was comparatively poor and the reserve stock which the cultivators sold at high prices in the previous year began to be exhausted. The high prices which ruled the market generally during the year under review, equally contributed to the falling off of toll receipts, by preventing goods from being carried to more distant marts."

The Executive Engineer, Balasore Division, observes as follows:—

"The export of rice and paddy is still well above the average, but less than the previous year, which was a very exceptional one. There was no loss in revenue, as so much more rice came through Range II of the Hijli Tidal Canal during 1897-98, as there was no closure, and the toll charge on Range II is Re. 1-2 per hundred maunds, as against annas 11 of Range I."

6. While the upward traffic of the past year showed a decrease of 2·95 per cent. in comparison with 1896-97, it was 19·51 per cent. above that of 1895-96. The chief articles, with their fluctuations, carried up-stream during the year 1897-98, as compared with the totals of the previous year, were as follows:—

Upward traffic.

		Total traffic registered in 1897-98.	Variations as compared with 1896-97.

As usual, the chief source of supply for all goods was Calcutta, and the chief consuming districts were Midnapore and Hooghly. Regarding the falling off under coal, the Executive Engineer, Cossye Division, states that the demand for this article for the construction of the Bengal-Nagpur Railway became less in the year under review, and what was required was carried over the Company's own lines. The decline under salt is said to have been due to its limited consumption in the jungle mahals of the Midnapore district, where the people felt some distress owing to the failure of the rice crops. The decrease under gunny-bags was due to the contraction of the trade in grains.

CHAPTER V.

BOAT TRAFFIC ON THE ORISSA CANALS.

The total quantity and value of the merchandise carried by country boats through the Orissa canals during the past three years are shown in the following table:—

Orissa Canals.	Weight of goods registered by weight.			Value of all articles of trade.

2. The distribution of the trade, district by district, during the past three years, was as follows:—

Down traffic.

3. The falling off in the down traffic was 9·36 per cent. and 24·42 per cent., as compared with the figures for 1896-97 and 1895-96, respectively. The fluctuations in the principal articles carried down-stream during the past two years are shown in the following statement:—

		Total traffic registered in 1897-98.	Variations as compared with 1896-97.	
			Increase.	Decrease.
Rice	Mds.	7,29,145	...	1,16,010

Salt ...	Mds.	12,995	5,085	...
Sugar, unrefined ...	„	32,445	12,670	...

The falling off under rice was due to the cessation of the famine in the previous year, and the increase in the case of raw hides is ascribed to there being a brisk demand for this article in Calcutta for export to Europe.

Upward traffic.

4. The up traffic showed an advance on the returns of 1896-97 of 47·60 per cent., and of 65·74 per cent. on those of 1895-96. The chief staples and their fluctuations, as compared with the preceding year, are given in the subjoined statement :—

BOAT TRAFFIC ON THE ORISSA COAST CANAL.

5. The total weight and value of the boat traffic registered on the Orissa Coast Canal during the past three years were as follows :—

The Executive Engineer, Balasore Division, states that the whole length of this canal was open for traffic throughout the year. The tonnage and number of boats were less than in the previous year, but there was an increase in the tollage, owing to the longer trips made during 1897-98. There were larger transactions made in paddy, as the result of the good crops and the continued high prices in Calcutta. The exports of rice and paddy from the Balasore district alone is said to have aggregated 5,79,070 maunds as against 4,11,750 maunds in 1896-97, while in the imports into that district, there were increases under unrefined sugar, salt and kerosine oil.

6. The abstract below shows the total import and export traffic, district by district, carried on this canal, during the past year, as compared with the figures of the preceding two years :—

CHAPTER VI.

BOAT TRAFFIC ON THE CALCUTTA CANALS.

The total quantity and value of the trade of Calcutta carried by country boats along the Calcutta canals during the past three years, are given in the subjoined table :—

	Quantity.			Value.

Boats which have been loaded or are to be unloaded at the Port Commissioners' wharves on the Hooghly are registered by the Port Commissioners, and not at the canal stations.

2. As in the case of the Nadia Rivers traffic, the steamer service has been steadily encroaching on the country-boat traffic carried by this route, as will be seen from the following extract from the Annual Report for 1897-98 of the Toll Collector of the Calcutta canals :—

"The collections for 1897-98 I anticipated would have been very large, as the rice crop was very good in nearly all the districts. I understand that the larger portion is kept back in the mufassal, the reason being that they are afraid to send it till it is known what the next crop will be like. If good, then we should have heavy "rice" traffic during the next four or five months. The collection would have shown a still further decrease if it had not been for large jute crops, which article shows an increase of Rs. 17,042. Under all other heads there is a decrease. Another reason for yearly decrease in the canal revenue is the large increase of steamers and flats using the Sundarban route. Many years ago a very few were running; now the number is very large, as shown in the margin. All these vessels carry cargo that used to be sent by country boats. Of course all the cargo carried by steamers and flats can be insured; this tends to drive the produce away from the country boats."

3. The foregoing statement shows a falling off in the import traffic of the past year, the total quantity registered being 6·33 per cent. below the figures for 1896-97, and 11·86 per cent. below those for 1895-96. The largest fluctuations occurred under paddy, gram and pulses, raw jute, unrefined sugar and *til* seed, as shown below :—

The largest decrease occurred in the consignments from the North-Western Provinces and Oudh, and was due to the imports from Cawnpore, Alighar, Bulandshahr, and Etawah having fallen off by 51,315 maunds, 36,654 maunds, 13,575 maunds, and 11,467 maunds, respectively. The falling off under Bombay was 64,840 maunds. On the other hand, there was an increase under Bengal proper, Berar, and Panjab by 37,144 maunds, 20,874 maunds, and 15,957 maunds, respectively.

In the year under review there has been a further decrease to the extent of 19·8 per cent. in the exports to foreign ports, as compared with 1896-97. The trade with the United Kingdom fell away by 23·2 per cent.; with Austria-Hungary by 60·1 per cent.; with Belgium by 55·3 per cent.; with France by 12·3 per cent.; with Germany by 35·4 per cent.; with Italy by 27·3 per cent.; with Japan by 58·5 per cent.; and with "other countries" by 19·6 per cent., while China took 116·6 per cent. more than in 1896-97.

The decline in the total exports is attributable to the cotton crop of the past season being below the average, owing, in the first instance, to the late advent of the rains, which prevented sowing and interfered materially with healthy germination, while on irrigated lands over-irrigation proved injurious to the seedlings; and, secondly, owing to a small acreage only being sown, while the greater portion of the soil was utilized for food-grains and fodder.

The fluctuations in the foreign trade are explained by the Collector of Customs, Calcutta, as follows:—

"There was a substantial increase in the total imports of *Twist and Yarn*, which are 2 million pounds in excess of 1896-97, the figures being the highest tabulated.

"*Dyed Yarns* have increased by 1½ million pounds over the previous year, while the figures for other descriptions of *Yarn* are phenomenal, as there is an increase of 2 million pounds in comparison with 1896-97. It is noticeable that although the total quantity under *Twist* and *Yarn* has advanced to such an extent, there has been a small decline in the total value as compared with 1896-97. The most important increase is in the figures for the sub-head *Mule*, Nos. 33 to 42, which points to a large increase in the imports of 40s *Mule*."

9. The imports by sea of Indian cotton twist and yarn represent, for the most part, the produce of the mills in Bombay, while the supplies carried by other routes were derived from the mills in the vicinity of Calcutta. The remarks made under this head by the Collector of Customs, Calcutta, are as follows:—

Indian twist and yarn.

"There is a marked increase in the importation of *Cotton Twist and Yarn* of Indian manufacture in comparison with 1896-97, being 15 per cent. in excess of that year, and the figures are the highest tabulated. As mentioned last year, this trade consists almost entirely of counts below 30s, the bulk in fact being of 20s to 24s count, which are in good demand in Calcutta, most of the local mills preferring to confine their production to the counts of *Yarn* best adapted to the class of cotton mixings obtainable in Bengal. The paucity of demand from China owing to adverse exchange is responsible for the partial diversion of the stocks of *Yarn* in Bombay to this market. There has been a considerable falling off in the imports of *Cotton Piece-goods* of Indian manufacture. The decrease is 32 per cent. as compared with the previous year. There is little doubt that the period of famine was mainly accountable for this decline."

In the case of imports by rail, the value of goods has been calculated according to the value rates of the different exporting provinces. Under the other heads values have been calculated at the rate of Rs. 65 per maund, which has been taken to represent the average value of a maund of European piece-goods in Bengal in 1897-98.

The Customs Resolution of the Government of Bengal for 1897-98 contains the following remarks in respect of the imports of cotton-goods from foreign ports :—

"The total imports of cotton goods, including twist and yarn, decreased by 17 per cent. in comparison with 1896-97. The heavy imports of the previous year, which could find no outlet owing to the prevailing distress, became a drag on the market, necessitating the carrying forward of large stocks which seriously interfered with the free flow of orders to Lancashire, and resulted in lower prices, to stoppage of machinery and disputes regarding wages. The good monsoon and bountiful harvests have, however, helped to relieve this unsatisfactory position, and prospects all round are considerably brighter with the close of 1897-98."

Exports.

16. The total export trade showed a decrease of 4·39 per cent. in comparison with 1896-97, and of 6·55 per cent. as compared with 1895-96. The following statement shows in detail the different Provinces to which piece-goods were exported from Calcutta during the past three years.

Comparison of imports with exports.

17. With an addition of 25 per cent. to the total clearances from shipboard and from bond on account of under-statement of values, insurance, landing charges, &c., &c., the total value of the past year's import traffic would amount to Rs. 14,43,23,165. Of this amount, the value of piece-goods exported

during the year was Rs. 12,20,77,230 as shown above. The value of the excess of imports over exports, therefore, amounted to Rs. 2,22,45,935, as against Rs. 5,01,64,397 in 1896-97 and Rs. 2,69,68,199 in 1895-96, and this sum represents the consumption of Calcutta and the stocks in hand.

TRADE OF BENGAL PROPER (EXCLUDING CALCUTTA).

18. The value of the trade of Calcutta with each revenue division comprised in Bengal proper in European piece-goods during the past three years, is given below:—

Comparison of imports with exports.

20. If exports are deducted from imports, the value of piece-goods left for consumption during the past year was Rs. 4,23,88,670, which, among a population of 44,510,713 souls (excluding Bihar and Orissa), would give an average consumption of Re. 0-15-3 worth of goods per head, as against Re. 1-1-1 in 1896-97 and Re. 1-1-6 in 1895-96.

TRADE OF BIHAR.

Comparison of imports with exports.

23. The result of the year's traffic was an excess of imports over exports to the extent of Rs. 2,75,51.320, which gives an average yearly consumption of Re. 1-2-1 per head of a population of 24,393,504 souls, as against Re. 1-3-1 in 1896-97 and Re. 1-3 in 1895-96.

31. Ten cotton mills were worked by steam in Bengal during the past year, five being in Howrah, four in the 24-Parganas district, and one in Hooghly, the last being the only mill in which piece-goods were manufactured; the value of the outturn of those goods in 1897-98 was Rs. 2,34,717, as against

Rs. 1,92,871 in 1896-97. Regarding the condition of the hand-loom manufacture in the interior of Bengal, the local officer's report as follows :—

Burdwan Division—"Cotton-cloth is manufactured in all the districts of this Division, but it is gradually being ousted from the market by cheap Manchester fabrics. Many weavers in Burdwan and Midnapore are reported to have given up their looms and betaken themselves to agriculture and other occupations. In Bankura this business almost ceased for a time during the prevalence of the famine, and there was considerable distress among the weavers in consequence. Fine cotton cloths, with silk, silver and gold embroideries, made at Nimtala in Midnapore, are said to be in great demand in Bombay. Cotton-cloths of various kinds are manufactured in the Midnapore Central Jail."

Presidency Division.—"The fall in the demand for cloth woven in Santipur continues, but actual statistics are not available. The weavers of Kushtiya and Kumarkhali make cotton dhoties, bed sheets, &c., which are largely in use among the middle classes. The cotton wrappers made by these men are well known, and are largely used by the poorer classes on account of their cheapness. The manufacture of coarse cotton cloth is carried on in all the districts of this division, but the cotton industry is steadily declining, as hand-weavers find it difficult to compete with foreign piece-goods."

Dacca Division.—"Hand-loom weaving is carried on at various places in all the districts of the Division, but the weavers are nowhere said to be in a flourishing condition, and apparently the cotton duties have not thrown more work in their hands. Dacca manufactures, such as plain and striped muslins, *kasidas*, *jamdanis*, plain *dhoties* and *chudders* form somewhat important articles of export from the Division. In the Faridpur district country-made striped cloth called *charkhana*, of a fine quality, is manufactured on a small scale in the Sadar subdivision and exported to the neighbouring districts."

Bhagalpur Division—Monghyr.—"Matia or coarse cloths and printed *saris*, which find favour on account of their cheapness, were manufactured in Sheikpura in the Jamui subdivision."—*Purneah.*—"The manufacture of coarse country cloth which is used by the lower classes of the people is declining owing to the introduction of European piece-goods."—*Malda.*—"The manufacture of cotton piece-goods is steadily declining owing to the difficulty experienced by the weavers in competing with the cheap European piece-goods so largely imported."

Orissa Division—"Country-made cloth is preferred by the people on account of its durability and comparative warmth in the cold season."

Chota Nagpur Division.—"Coarse cotton cloths are manufactured all over the Division by the village Jalahas. The cloth is strong and durable, and is preferred on this account by the common people."

The past season has proved to be the worst on record, since notwithstanding the total outturn being so small as compared with the average of the past few years, the prices were very low owing to the scare, and the heavy stocks in hand in London. The great decline in the exports from the North-Western Provinces

and Oudh, was due to the smaller consignments from Etawah (7,616 maunds), and from Aligarh, (5,718 maunds), as compared with 1896-97. As regards the districts in Bihar, the falling off in exports from Champaran was 8,948 maunds from Muzaffarpur, 4,689 maunds, from Saran, 4,611 maunds, and from Darbhanga, 2,966 maunds.

34. The total exportation by sea during the past three years is shown below:—

The exports declined to the very considerable extent of 34·5 per cent., as compared with 1896-97. The falling off is chiefly noticeable in the exports to the United Kingdom. With the exception of the United States, the trade with which has continued much the same as in the previous year, the exports have generally declined with European countries.

To over-production, to the tightness of the money market, to the substitution of chemical dyes, to the Badische scare, and to the heavy stocks in the home market may be attributed the unfortunate condition to which this once thriving industry is now reduced.

The condition of the last year's crop is thus explained by the Collector of Customs, Calcutta:—

"The published forecasts of the past season's crop were very favourable, and have been fully verified. The earthquake, so far from having any damaging effect on the crop, was of considerable advantage to it; the flooding of the lands in many parts and the heavy rainfall immediately following the earthquake, all these coming just when the plants were at their season of strongest growth, increased the yield of most districts to over and above the estimated outturn. And as, moreover, there was no lack of water for steeping purposes, the plants were allowed to mature to their full size before being cut. The quality during the first-half of the season was above the average, but fell off considerably later on owing, one would suppose, to the want of sufficient labour to handle properly the enormous quantities produced in some districts. Prices opened at the beginning of the season at fair average rates, but fell away rapidly under the influence of the large quantities available, recovering again to a small extent from the low point to which they were forced by fears of a further fall in value."

Exports.

37. The destination of the exports by sea during the past three years is shown in the following statement :—

The total exports to foreign ports increased in quantity by 32 per cent., but in consequence of the low price prevailing during the year, the aggregate value decreased by 4·3 per cent. Larger exports were made to the United Kingdom, Austria-Hungary, France, Germany, Italy, Spain, the United States and Australia, while China, Japan and "other countries" took smaller supplies.

39. The great divergence in the figures between imports and exports represents part of the outturn of the mills in Calcutta and the suburbs which does not fall within the scope of registration. The principal districts which despatched gunny-bags in large quantities to Calcutta during the past three years are shown in the following table:—

On this subject the Commissioner of the Presidency Division quotes the following remarks:—

"This year again the country demand has been exceedingly small. The production has, however, all been taken off monthly for export. During the year prices have fallen about 5 per cent. all round. So many Hessian looms having been started in the latter part of 1896-97 and early in 1897-98, have resulted in prices having fallen about 30 per cent. all round during the year under review. On the 31st March 1897 the market rate was as follows :—Hessian wheat bags Rs. 13-12 per cent. *fas*. Hessian cloth 40·83 Rs. 8-8 per cent. yards *fas*, whereas on 31st March 1898 the market rates were Rs. 10 *fas* and Rs. 5-10 per cent. yards *fas* for these respective qualities, other qualities being in proportion. Bombay buyers having become panic-stricken in December 1897 and January 1898, and having re-sold their holdings at any prices obtainable, helped to bring rates down to their present level. With almost no demand from Bombay, we cannot but think that for the present the production of Hessian is in excess of the demand. Cheap jute has enabled most mills to make fair profits during the latter six or nine months of the year 1897-98."

40. The distribution of the export trade by sea during those years is given in the following statement:—

In the export to foreign ports, there was an increase of 19·9 per cent. in comparison with 1896-97, due to the larger amount of machinery now at work in Bengal.

GUNNY-CLOTH.

41. The registered trade of Calcutta in gunny-cloth carried by internal routes during the past year, as compared with the totals of the two previous years, was as follows:—

SPECIFICATION OF ROUTES.	IMPORTS.			EXPORTS.

42. It has been explained in previous reports that gunny-bags and gunny-cloth are shown together in the railway returns. The foregoing figures, therefore, do not represent the actual extent of the transactions in Calcutta under this head, part of the trade in gunny-cloth having already been included under the head "gunny-bags." In the case of the trade by road and river this article is registered by pieces, while in the sea-borne trade returns it is shown in yards. For the purpose of converting pieces into yards a machine-made piece is taken as equal to 80 yards and a hand-made piece as equal to 22 yards.

43. The sea-borne trade of Calcutta under this heading during the past three years is shown below:—

44. As regards the imports by internal routes, the total trade of the past year comprised 7,866 pieces of power-loom manufacture and 25,785 hand-made

pieces. The principal localities which despatched power-loom and hand-made gunny-cloth to Calcutta during the past three years were as follows:—

45. A machine-made piece being taken as equivalent to 80 yards and a hand-made piece as equal to 22 yards, the total imports, both by internal routes and by sea, amounted to 1,366,871 yards, as against 1,539,076 yards in 1896-97 and 1,330,029 yards in 1895-96.

The exports to foreign ports in 1897-98 have again advanced, and the figures are now the highest recorded during the past five years. This is due, as in the case of gunny-bags, to the very large increase of manufacture during the past year. The only country which shows a decrease is the United Kingdom, the quantity being 22 per cent. less than in 1896-97.

Outturn of the mills in the vicinity of Calcutta.

47. In addition to the registered supplies detailed above, the consignments of power-loom gunny-cloth sent up-country direct from the neighbouring mills, without passing the Port Commissioners' wharves, but intercepted at the toll stations on the Nadia rivers, were as follows:—

48. The number of jute mills worked by steam in the vicinity of Calcutta during the past year was 32, as against 29 in 1896-97, and 26 in 1895-96. The quantity of jute worked up in 1897-98 was 96,73,431 maunds, as against 84,29,568 maunds in 1896-97 and 80,75,587 maunds in 1895-96. Figures are not available to show separately how much of the raw material was used in making gunny-cloth and gunny-bags. The table below shows the number of looms and spindles at work, and the aggregate quantity of raw jute consumed in the mills in each district during the past three years:—

51. By far the largest improvement was in the imports from the North-West Provinces and Oudh, and was due to the despatches from Bulandshahr having increased by 4,28,611 maunds, from Aligar by 1,90,053 maunds, from Muzaffarnagar by 1,83,811 maunds, from Meerut by 1,25,798 maunds, from

Bara Banki by 1,15,719 maunds, from Shahjahanpore by 98,449 maunds, from Moradabad by 95,218 maunds, from Bareilly by 82,780 maunds, and from Saharanpore by 73,223 maunds. The decline in the supplies from Bengal was chiefly in the exports from Nadia, Murshidabad, Hooghly and Faridpur, which fell off by 83,957 maunds, 68,221 maunds, 11,552 maunds and 7,236 maunds, respectively. The districts in Bihar which sent considerably smaller supplies than in 1896-97, were Bhagalpur (81,330 maunds), Monghyr (80,924 maunds), the Sonthal Parganas (33,880 maunds), Shahabad (25,676 maunds), Purnea (14,466 maunds) and Malda (13,784 maunds).

55. The falling off in the imports from Bengal was due to the despatches from Nadia having declined by 10,63,233 maunds, from Jessore by 1,72,380 maunds, from Faridpur by 1,29,331 maunds, from Rajshahi by 78,129 maunds,

from Murshidabad by 68,348 maunds, from Hooghly by 53,577 maunds, from Pabna by 26,665 maunds, from Khulna by 18,638 maunds, from Dacca by 17,594 maunds, and from Burdwan by 13,882 maunds. The Bihar districts which showed an increase, were Monghyr (97,011 maunds), Patna (68,708 maunds), Bhagalpur (44,518 maunds), Shahabad (44,251 maunds), Darbhanga (29,412 maunds), and the Sonthal Parganas (28,750 maunds). The principal fluctuation in the imports from the Panjab was an increase of 60,127 maunds in the supply from Delhi as compared with that of the previous year.

56. The details of the sea-borne exports during the past three years, are given in the following statement :—

The decrease in the total exports is attributable to the scarcity during the past year. When the new season's crop did reach the market, the prices were abnormally high and restricted exports to a great extent.

In shipments to Mauritius there was a fall of 7·5 per cent., to Ceylon of 20·8 per cent., and to "other countries" of 80·6 per cent., whilst the Straits Settlements showed an increase of 13·2 per cent.

The chief feature of the past year's trade is the large increase of over 33¾ lakhs of maunds in the quantity of rice and paddy received in Calcutta from Burma for despatch to the different parts of India to meet the demand caused by the recent famine. Though the imports from Bengal proper showed an advance of about 7⅓ lakhs of maunds, as compared with 1896-97, yet they were about 14¼ lakhs of maunds less than those of 1895-96. The cessation of the famine during the second-half of the year under review accounts for the falling off in the receipts from Orissa.

The total exports of rice during the past year showed a small increase of about 3½ lakhs of maunds, but they were still nearly 49 lakhs of maunds below the figures of 1895-96.

The falling off in the exports of rice to foreign countries was 2·74 per cent. as compared with 1896-97. Germany, Arabia, Persia, Ceylon, China, and the Maldives took larger supplies of rice, while smaller shipments were made to the United Kingdom, Cape Colony, Mauritius, Natal, Réunion, and West Indies. Ceylon, which is the principal market for Bengal rice, took 41·4 per cent. more than in 1896-97, while the exports to the United Kingdom and to Mauritius, the next largest consumers of rice, decreased by 13·6 and 7·9 per cent., respectively.

Stocks of rice in Calcutta.

MISCELLANEOUS SPRING AND RAIN CROPS.

The staples comprised under this head are barley (*Hordeum vulgare*), *kodo* (*Paspalum serobiculatum*), *shama* (*Oplismenus frumentaceus*), Indian-corn (*Zea mays*), oats (*Avena sativa*), millets (*Panicum miliare*), and other crops which are reaped during the spring and rainy seasons. The aggregate quantity carried to, and from, Calcutta during the past three years is given below:—

The large increase in the imports from the Panjab was due to the consignments from the Delhi and the Gurgaon districts having increased by 28,299 maunds and 7,214 maunds, respectively. As regards the North-Western Provinces and Oudh, the supplies from Aligarh showed an increase of 11,388 maunds, from Agra of 8,133 maunds, from Banda of 4,418 maunds, from Etawah of 3,067 maunds, from Bulandshahr of 2,731, and from Fatehpur of 2,059 maunds. On the other hand, there has been a still further decline of 94,907 maunds, in the importation from the districts of Bengal during the past year, which occurred chiefly in the imports from Nadia (58,575 maunds) and from Murshidabad (34,842 maunds).

68. The Annual Salt Report of the Board of Revenue gives full details as regards the sea-borne imports, as well as the fluctuations in prices during the past year. In the following pages, therefore, information is only given concerning the destination of the export traffic shown above.

69. The different provinces to which the salt was consigned from Calcutta and Bhadreswar during the past three years are shown in the subjoined statement:—

According to the foregoing figures, the total quantity of salt retained for consumption in Calcutta, the Suburbs, Hooghly, and a part of the 24-Parganas district, and also for exports to the interior was 5,24,924 maunds, as against 5,45,904 maunds in 1896-97 and 10,15,159 maunds in 1895-96.

71. The quantities of salt carried to each of the Divisions of Bengal Proper (as distinguished from Bihar and Orissa) from Calcutta direct during the past three years were as follows:—

The aggregate total of these two sections of the trade therefore amounts to 57,66,094 maunds, as against 57,59,229 maunds in 1896-97 and 52,96,091 maunds in 1895-96.

72. The following statement shows the total quantity of salt exported to places outside the six Divisions shown above, during the past three years:—

74. These figures give a rate of 11 lbs. 10½ oz. or 5 seers 10 chitaks per head of the population which, according to the census of 1891, consists of 44,510,713 persons. In 1896-97 the rate per head was 11 lbs. 10 oz., or 5 seers 9⅝ chitaks, as against 11 lbs. 10⅓ oz., or 5 seers 10⅝ chitaks in 1896-97.

75. The importation of salt into Bihar from Calcutta during the past three years was as follows:—

The aggregate quantity of salt carried to Bihar therefore amounted to 28,88,234 maunds, as against 29,16,282 maunds in 1896-97, and 27,53,149 maunds in 1895-96.

76. The abstract below shows the total exportation of salt from Bihar by rail and by road during the past year, as compared with the totals of the two previous years:—

77. The net quantity left for consumption within Bihar last year was 25,75,744 maunds. The population of Bihar being 24,393,504 persons, this supply would furnish 8 lbs. 11 oz., or 4 seers and $3\frac{1}{2}$ chitaks per head of the population for the year, as against 9 lbs., or 4 seers 6 chitaks per head in 1896-97, and 8 lbs. $8\frac{1}{3}$ oz., or 4 seers and $2\frac{2}{3}$ chitaks per head in 1895-96.

78. The salt trade of the Orissa Division is fully dealt with in paragraphs 18 and 25 to 53 of the Annual Salt Report of the Board of Revenue, L. P., for the year 1897-98, and is therefore not noticed in this report.

The Patna Division is an important seat of this industry. The Commissioner writes:—

"Saltpetre is principally manufactured in the North Gangetic districts. The manufacture is under the control of the Northern India Salt Department. The subjoined table compares the quantity of saltpetre and salt produced in each of the districts during the past two years:—

Total ...	3,61,435	3,09,522	21,447	19,555

"It will thus be seen that there was a general decrease in the manufacture of saltpetre, in all the districts, the decrease being attributed by the Superintendent of Salt Revenue to the low price ruling in the saltpetre market. In Champaran the diminution is due to a smaller number of refineries having worked during the year. Saltpetre is manufactured in small quantities in the districts of Gaya and Shahabad also."

81. The total quantity exported by sea during the past three years was distributed as follows :—

In comparison with 1896-97, the exports to foreign countries fell away during the past year by 21 per cent. The decline in this trade may be attributed to reduced manufactures owing to restricted demands from the United Kingdom, which is the principal consumer, and where extensive stocks of the previous year's importations (which were the largest on record) remained unsold.

LINSEED.

82. The gross weight of the Calcutta traffic in linseed during the past year, as compared with the figures of the two previous years, was as follows :—

The principal districts which contributed to the increased imports from the North-Western Provinces and Oudh in comparison with 1896-97 were Bara Banki (1,27,325 maunds), Basti (80,696 maunds), Baraich (36,073 maunds),

Gorakhpur (24,250 maunds), and Gonda (15,673 maunds). The improvement under Bengal is chiefly due to the increase of 56,918 maunds in the supplies from Nadia.

There were increases in the shipments to United Kingdom, France, and United States, against a decrease in the exports to Germany, Holland, and other countries, whilst the shipments to Egypt have totally ceased.

As compared with 1896-97, the increase in the imports from Bihar was most conspicuous in the consignments from the Sonthal Parganas, (1,76,640 maunds), Bhagalpur (1,58,136 maunds), Darbhanga (96,940 maunds), Patna (96,895 maunds), Monghyr (72,651 maunds), Purnea (67,944 maunds), Champaran (62,576 maunds), Muzaffarpur (48,149 maunds), and Saran (45,505 maunds).

The fluctuations under Bengal occurred in the consignments from Faridpur, which increased by 63,937 maunds, from Pabna by 60,895 maunds, from Dacca by 53,112 maunds, from Mymensingh by 50,771 maunds, and from Nadia by 26,478 maunds. The advance in the supplies received from Assam was due to the despatches from Goalpara, Sibsagar, and Kamrud having increased by 1,10,401 maunds, 30,664 maunds, and 30,002 maunds, respectively.

The quantities shipped for Belgium increased by 138·4 per cent., those for Germany by 281 per cent., and those for "other countries" by 353 per cent., whilst the United Kingdom and France, which took nothing during the past two years, came forward for their supplies last year.

The following remarks illustrative of the condition of the silk industry in the interior of Bengal during the past official year are taken from the Divisional Administration Reports:—

Burdwan Division.—"In Burdwan the total quantity of cloth produced rose from 47,585 yards in 1896 to 53,905 in 1897, and the value thereof from Rs. 43,484 to Rs. 53,288. This

industry is carried on in Mankar, Memari and two other villages in the Sadar, and in the villages of Bagtikari, Musthali and Ghoranash in the Katwa subdivision. In Birbhum the total outturn was 43,000 lbs. against 40,080 in 1896-97. The two silk filatures at Ganutia and Bhadrapur, with two branch factories, continued to work as before. In Bankura the manufacture of mulberry silk thread and cloth is carried on to some extent in the town of Vishnupur and at Birsinga, a village lying eight miles north of the former. Silk-worms are also reared, but on a limited scale, in some parts of the district, and the quantity of silk-cocoons locally obtained being small, considerable quantities of these are imported from Midnapore in order to meet the demand of the local manufacturers. Vishnupur continues to produce the finest silks, which have, however, been superseded by the cheaper fabrics produced in other parts of the country. The manufacture is, therefore, on the decline. That of *kutni*, a mixture of silk and cotton, is almost extinct, as the demand for it, formerly existing in the North-Western Provinces, has almost ceased. 3,840 pounds of raw silk were manufactured at the Nimtala factory in the Ghatal subdivision. There is a French concern at Gureli, in the same subdivision, for reeling tasar and yellow silk from cocoons. Silk is also reeled at the Moheshpur Factory. Damasked silk scarfs, wrappers and handkerchiefs manufactured by the native weavers of Ghatal, Nimtala, Radhanagar and Khirpai are exported to Calcutta, Bombay, Madras and other places for sale. Silk *dhuties* and *erendi* cloth manufactured in thana Daspur are largely in request. These are also manufactured on a smaller scale at Anandpur in the Sadar subdivision. Silk fabrics are produced in the Jahanabad subdivision of Hooghly, but the weavers are unable to compete with the cheaper goods turned out by machinery, and the business is in a state of decline. It is reported that the tasar made in the Katwa subdivision from wild cocoons brought from the jungles of the Sonthal Parganas, continues to maintain its ground in the Calcutta market as the best of its kind, and that the article is exported in large quantities to Madras, where it is in great favour with ladies of the upper classes. Tasar is also manufactured in the villages of Karidha, Tantipara, and Bisingpur of Birbhum. It is woven from cocoons imported from Singhbhum, Manbhum and the Sonthal Parganas, and reeled by hand. The industry is, however, languishing. In Bankura, although tasar is manufactured in some villages, the town of Bankura and the village of Birsingpur form the chief centres of the industry. Tasar cocoons are reared in some parts of thanas Khatra, Raipur and Bankura; but owing to the prevailing scarcity there was very little demand for tasar cloth, and the manufacture was carried on on a very limited scale during the year. Tasar fabrics are reported to have been most extensively manufactured in the villages of Anandapur and Kasiari, in the Sadar subdivision of Midnapore. Such stuffs are also turned out in the Jahanabad subdivision of Hooghly, but the weavers find it hard to compete with machine-made goods."

Presidency Division.—"The silk industry is chiefly carried on in the districts of the 24-Parganas and Murshidabad. The table below compares the state of this industry during the last three years :—

District.	Number of factories.			Produce.			Value.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.

The manufacture of silk cloth at Mirzapur, in the district of Murshidabad, is gradually declining. The number of pieces of silk cloth manufactured during the year under report was 6,052 valued at Rs. 45,396, against 6,895 pieces valued at Rs. 47,465 of the preceding year."

Rajshahi Division.—"The yield of silk was rather short in Rajshahi, the quantity manufactured being 135,831 lbs., as against 137,574 lbs. in the preceding year. This is exclusive of the Serail Factory, the statistics of which have not been furnished by the Manager. Endi cloth, a coarse silk, is manufactured in small quantities for home consumption in Dinajpur, Jalpaiguri, Rangpur, and Bogra."

Bhagalpur Division.—"The pure and mixed wild silks known as *tasar* and *bafta* were manufactured in the Sadar subdivision. The quantity of these articles manufactured is not known, but they form one of the important manufactures of the district of Malda. The two European silk factories at Bholahat and Baragharia produced 47,202 lbs. of silk of an estimated value of Rs. 3,03,233, against 42,571 lbs. of an estimated value of Rs. 3,13,294 in the preceding year. The estimated value of the silk produced in the native filatures was Rs. 9,00,000 against Rs. 8,00,000 in the previous year. The estimated value of the silk piece-goods manufactured during the year was Rs. 30,000 against Rs. 40,000. The demand for these cloths was not very large owing to the scarcity as well as the plague in the Bombay Presidency."

Chota Nagpur Division.—"Tasar cloths are manufactured at Raghunathpur and Singbasar in Manbhum, but I fear that many families of *Tantis* employed in this industry were

finally thrown out of work during the late scarcity, notwithstanding the attempts made to enable them to continue work by means of advances from the charitable relief funds. The estimated outturn of the year was 36,000 yards, worth about Rs. 36,000, at Re. 1 per yard. Tasar cocoons are also exported in large quantities to Murshidabad from the district of Hazaribagh. A certain quantity are, however, unreeled locally by a class of people called *Patwaries*, but the thread produced is also exported to Murshidabad."

As regards imports from foreign countries, refined sugar shows a marked increase of 117·7 per cent., to which all the exporting countries, except the United Kingdom, contributed. This increase is attributed to the continued operation of the Continental bounty system. The past year's trade was further favourably assisted by a plenteous beet crop and an advancing exchange. At the same time, it is not believed that the trade has been a lucrative one: supply was invariably in excess of demand, causing a continual decline in prices.

94. The subjoined table shows all the principal districts which contributed to the import trade carried by internal routes during the past three years:—

The following accounts of the sugar industry in Bengal are extracted from the Divisional Administration Reports for the past year:—

Burdwan Division.—"The manufacture of molasses from sugarcane is common to all districts of this Division, but that from the juice of the date-palm is produced on an extensive scale in the districts of Burdwan, Hooghly and Howrah only. In Burdwan, the Behia mills are extensively used for pressing sugarcane. Some factories at Raipur in Birbhum continued to manufacture cane-sugar, the production and consumption of which was, however, very limited, imported refined sugar of a superior quality being cheaper.

Presidency Division.—"The following table compares the state of the sugar industry during the last three years:—

"As in the preceding year, no statistics have been received from the Manager of the Sugar Mill at Cossipore. Sugar is still manufactured from sugarcane and date-juice by primitive native process in the subdivisions of Basirhat and Barasat, in the district of the 24-Parganas; but, as the demand for machine-made sugar has steadily increased, sugar manufactured by native methods is not in a flourishing condition. In Nadia sugarcane is largely cultivated in the Kushtia and in part of the Chuadanga subdivisions. In the former subdivision the sugarcane-crushing mill factory worked throughout the year. Information regarding this mill has been refused by the Manager of the factory, but it is known that the system followed is to distribute the machines to local agents, who let them out on hire at a rupee or so a day. The principal centres of the date-sugar industry in this district are Santipur, Chakdaha, Kishenganj, Dowlutganj, Alamdanga and Mohesganj, but it is stated that no statistics are available. There are three refined sugar manufactories under European management in the district of Jessore."

The condition of the tea industry in Bengal is criticised in the Divisional Administration Reports for the past year as follows:—

(a) Revised figures.

"The outturn of tea has increased by over a million and-a-half of pounds in the Division, but there was an appreciable decrease in Darjeeling, within which district no application was made during the year for the grant of fresh land. In Jalpaiguri 13 applications were received, against 29 in 1896. There was a deficiency in the yield per acre, due to insufficient rainfall at the commencement of the monsoon, which retarded flushing, and leaf for manufacture was short. The year under report was a healthy one, and mortality among the coolies is reported to have been much below normal. After years of opposition every garden now keeps a chaukidar to report crime, births, and deaths, and this necessary adjunct to our police agency has had none of the disturbing effects on the coolies that many planters anticipated. The labour population in tea-gardens in Darjeeling was 32,897 persons and in Jalpaiguri 37,627.

"The industry is still a flourishing one, in spite of the great fall in price in recent years. It is, however, threatened by a more serious danger. The Jalpaiguri returns show that 65,072 acres was the area under tea during the past year, against 50,550 acres in 1896. Of this amount, 18,167 acres carried immature plants, whilst the enormous area of 145,718 acres has been leased from Government for tea, but has not yet been planted. We are, in fact, face to face with a great increase in output, which must reduce tea to a price that cannot possibly pay cultivation and manufacture. Overproduction is a bane, which is already working havoc. Many once flourishing concerns are now yielding little profit, and often show an appreciable loss. Prices this year (1898) have fallen to a point previously unknown, and men of experience fear a catastrophe in the tea industry in the near future. Moreover, it is not only railways that are being introduced in China, but machinery also and tea-manufacturing machinery as well. Chinese competition has been defeated chiefly by machinery in our Indian gardens, but is very likely to revive with the introduction of sirocoos and sifters of European make into the Chinese tea-producing provinces.

"The following statement, showing the average dividends paid by registered gardens in India in 1894, 1895 and 1896, is a very unpromising one:—

District.	Number of gardens.	Average of dividends paid per cent. of Capital.		
		1894.	1895.	1896.
1	2	3	4	5
Assam	47	7·4	6·3	4·3
Duars	15	14·2	14·0	8·7
Darjeeling ...	23	8·9	7·2	4·6

"All the figures for 1897 are not available, but the profits were certainly much lower even than in 1896. Up to date, according to the financial journal, *Capital*, the average dividend of 71 gardens is under 2 per cent."

Chittagong Division.—"Seventeen tea-gardens continued working during the year, and the quantity of tea exported amounted to 909,590 cwts., against 1,130,963 cwts. of the previous year. The decrease is due to the cyclone and the drought."

Chota Nagpur Division.—"The plantations exist only in Hazaribagh and Lohardaga. In the former district five gardens were at work, only four of which furnished returns which show an outturn during the past year of 36,200lbs. from 611 acres under cultivation. In Lohardaga there were 22 gardens, of which 21 were worked (one at Sukurhuta having been closed) yielding 931,695½lbs. of tea, against 586,524lbs. in the previous year. The weather during the year was fairly favourable to tea cultivation, and the prolongation of the rains causing a considerable increase in the outturn. The prospect of the industry in Chota Nagpur is not, however, hopeful. The climate is too dry and the soil not sufficiently deep and rich, while the tea produced is not of a superior quality. It is the local supply of chief labour which enables the industry to continue at all, but the difficulty in getting sufficient local labour is every year increasing, especially in Hazaribagh, owing to the constant drain for the supply of labour to Assam and elsewhere. This difficulty will probably be much increased with the opening up of the country by railways."

The exports of tea to foreign ports increased by nearly two million pounds, or 1·3 per cent., owing to larger shipments to all the importing countries. The excess of production over demand, the rise in exchange, and the fact that the teas were generally deficient in good liquoring quality, lowered the average price of the article, which stood at 8 annas and 5 pies per lb. in the year against 8 annas and 8 pies in 1896-97. In view of the active competition of Ceylon teas, the Indian planters have taken advantage of the warning note sounded, and are now endeavouring to manufacture a better liquoring quality of tea, and are not trusting entirely to quantity for their profit, experience having shown that most of the lower grades do not repay the cost of production and manufacture.

The exports to foreign ports showed a decline of 4·9 per cent. in comparison with 1896-97. The Collector of Customs, Calcutta, writes :—

"The principal fall was to Holland, amounting to 7·9 per cent. The very extensive shipments in 1892-93 and 1893-94 led to an accumulation of stock, and resulted in a heavy decrease in 1894-95 and a temporary cessation of exports in 1895-96; but large shipments have since been made, though not in such excessive quantities."

CHAPTER IX.

INLAND AND SEA-BORNE TRADE OF CHITTAGONG.

THE sea-borne trade of Chittagong is dealt with in the report of the Collector of Customs, Calcutta, on Trade and Navigation, but it is also noticed in this report for purposes of comparison with the inland trade.

The total inland trade of Chittagong carried by country boats during the year 1897-98 is compared below with the figures for the two preceding years :—

4. *Cotton, raw.*—The increase under this head is attributed to good crops in the Chittagong Hill Tracts coupled with a better demand for exportation.

5. *Jute, raw.*—Jute yielded a bumper crop, and larger shipments were made to the United Kingdom, Hamburg, and Dunkirk: prices, however, were low owing to over production encouraged by the high prices obtained in the two previous years. The quantities exported to foreign ports during the past three years were as follows :—

6. *Rice and paddy.*—The local crops were partly damaged by the cyclone of the 24th October 1897, but the chief feature of the traffic during the past year was the enormous quantities of rice imported into the Chittagong port from Rangoon and Akyab to meet the local demand caused by the drought

and scarcity of the previous year. There was also an improvement in the supplies brought into the Chittagong town by country boats as shown below:—

The importation of rice into this port by coasting vessels aggregated 5,34,394 maunds, as against only 79,041 maunds in 1896-97, but that of paddy showed a decline, namely 65,361 maunds against 1,20,317 maunds in the preceding year.

The exports of rice and paddy from this port to foreign countries during those years were as follows :—

The increase under rice was owing to larger exports to Ceylon and Trinidad.

The total supply of rice and paddy shipped from Chittagong to the different coast ports in India during the past three years, is shown below :—

The exports during the past year were chiefly to Cochin and Alleppy in the Madras Presidency, the increase being due to smaller shipments in the previous year.

The exports of salt from Chittagong by country boats during the past three years were distributed thus :—

Besides these supplies, the quantity of salt shipped for Narayanganj by sea-going vessels was 99,633 maunds, as against 5,126 maunds in 1896-97, and 71,658 maunds in 1895-96. The report of the Collector of Sea Customs, Calcutta, for 1897-98 contains the following remarks regarding the salt trade of Chittagong during that year :—

"The total importation of salt into Chittagong during 1897-98 was abnormal, the receipts having increased from 3,59,442 maunds in 1895-96 and 54,118 maunds in 1896-67 to 6,57,172 maunds in the past year. In his report the Collector remarks that the large increase in the import of salt is attributable to the smaller importation in the previous year, and to a cargo of Hamburg salt imported during the year under report. Hamburg salt was last imported into this port in 1892-93, and then the importation ceased, as the local consumers preferred the Liverpool Pungah. The decrease in revenue is attributed to smaller clearances of salt for local consumption, due apparently to the scarcity prevailing consequent on the last two years' bad rice crops and to the loss the people suffered by the cyclone of October last."
